

Felix Romano Output

Understood — I'll keep **everything exactly the same as your photo** (same cabinet design, proportions, panels, handles, sink/countertop, lighting, and background) and change **only the cabinet color** from black to a **brown warm-walnut wood finish**.

Before I generate it, one quick confirmation so it matches what you mean by "brown":

1) Do you want **solid brown paint** (flat color, no grain) or **brown wood texture** (warm walnut grain like real wood)?

If you don't answer, I'll do the most
